## LRC49 – Alcantara Cleaner

The Alcantara Cleaner is used to deep clean alcantara, you apply by spray, agitate with a brush then wipe off with a clean cloth.

Being a water-based Alcantara cleaner, this cleaner really does deep clean into the fibres of all types of alcantara.

Can be sprayed directly onto the surface then agitated in with a brush and then wiped off leaving behind a fresh clean looking surface. It also leaves a fresh smell.

The Alcantara cleaner has a great deep cleaning action to remove all types of stubborn stains from steering wheels, seats and trim, as well as fashion items and sofas at home and capable of removing oil stains, grease, food stains and drink spills.

It's an ultra-safe to use Alcantara cleaning solution.

- **Ultra-Safe**
- **Deep Cleans Alcantara**
- **Brightens Colour**
- **Removes All Stains**

Always check in a small hidden area before use.

Application is easy, dust off the seats or carpets to remove any loose particles of dust and debris, spray a generous amount of alcantara cleaner, allow to dwell for a short period of time then agitate with a bristle brush like a bruce or soft nail brush.

Continue to work the solution into the fibres so it gets to the bottom of all fibres then wipe off the liquid leaving behind a much brighter cleaner surface, for very stubborn stains repeat this process until the item is cleaned thoroughly.

On very stubborn stains, you can spray the cleaner directly onto the item and agitate it and leave for a couple of minutes to dwell, this will allow the cleaning agents to work away at the dirt and grime to help lift it away better. Once it has been left for a while, spray some more on then scrub in with the brush and then wipe away to leave a clean fresh smelling alcantara surface once again.

As with any product you should always test in a small hidden area first before using to ensure its suitable for the item its being used on, if colour is released stop at once and clean with water to dilute the cleaning solution on the surface.

Take a look at the [YouTube Video](#) about this product.

**Available sizes,** 50ml – 1.7fl oz, 100ml – 3,4 fl oz, 250ml – 8.5 fl oz, 500ml – 17 fl oz, 1ltr – 34 fl oz, 5ltr – 176 fl oz
