LRC10 Leather Air Freshener

The leather air freshener is a clear liquid that has built in leather aromas to bring back the smell of new leather again to items.

The leather air freshener can be misted into the air and allowed to drop around the area that requires the scent and smell of genuine leather.

This product can be sprayed onto the bottom of fabrics on sofa and leather suites and chairs, it can also be sprayed under car seats on to carpet areas, being careful to keep well away from any electrical items of ecu units.

In houses this can be misted around rooms, never apply a great deal of this and leave to dry as it will dry like spots if over applied.

If you wanted to you can apply this to a soft bamboo fibre cloth or a red LRC application pad and gently rub over your item, you don't want to apply it too wet as it would leave it streaky, apply just enough to get a fine layer to leave behind that leather aroma.

It can be misted into the inside of leather handbags, leather shoes and leather jackets, but again, we advise not over applying as the items on the inside are mainly fabrics are we don't want them to be left damp or this could encourage mould growth.

This product is to be used sparingly, a small 250ml bottle goes a long way and will last a considerable long time. It's a great product for someone who is a vehicle detailer who wants to provide the client with that built in leather aroma smell. Also, for someone who cleans carpets and offers leather cleaning as an add on service and wants to provide clients with a beautiful lasting leather aroma.
