## LRC17 – Suede & Nubuck Protector Spray

The suede and nubuck protector spray is designed to be spray applied to all suede or nubuck leather surfaces to give the leather a protective layer to help stop stains and dirt building up.

Make sure the items being protected are fully cleaned and dry before the application of the suede and nubuck protector spray is carried out.

Suede is a different type of leather finish to Nubuck leather and will require a different approach to application.

With suede being a fluffier finished leather, this will require a different approach to protect the suede leather surface. For Suede, spray an even coating on and brush into the fibres, when applying the coating, spray at a distance, between 6 to 9 inches away from the surface, as you don't want to flood the surface. It's best to apply several coatings to ensure all areas of the suedes leather is protected correctly. Once the first coating has been applied and dried, you can brush the suede fibres in the opposite direction and apply more suede and nubuck protection spray.

As suede is not as waterproof as nubuck is, it's important that the suede is protected, so brush in all directions, up, down, left and right this way you will get all the fibres protected deep down.

As nubuck is a much higher quality leather skin, and also naturally easier to waterproof as the fibre structure is much tighter this can be easily protected with just a couple of spray applications without the need to brush the fibres around.

After application of the suede and nubuck protection spray it's best to lightly brush the surface to give a nice new protected look to your leather. If this wasn't brushed, where too much has been applied, it will dry and it does not bond fibres together.

With suede and nubuck leather being a very absorbent leather, it's extremely difficult to make them fully waterproof. With any suede and nubuck protector, the purpose is to give you that window when something has been spilt on your item, it allows you time to wipe away before the spill penetrates the surface coating. We advise to recoat every 3 months to keep that protection level at its best.

Take a look at the [YouTube Video](#) about this product

**Available sizes,** 50ml – 1.70 fl oz, 100ml – 3.4 fl oz, 250ml – 8.5 fl oz, 500ml – 17 fl oz, 1ltr – 34 fl oz, 5ltr – 176 fl oz

**Use Within,** Use within 24 months of purchase.

**Manufacturers Warranty 12 months from point of sale.**

**Temperatures,** do not allow to freeze or go below 7 °C.

**Before Use,** always check in a small hidden area before using to ensure its suitability for the leather.

**Colour,** a shade of white.

**Smell,** no aromas added.

**Formula,** water-based leather sealer.

**Skin Allergies,** if you have skin allergies always wear gloves, wear goggles when applying.

**Cautions,** Harmful if swallowed. Keep out of reach of children, may cause skin irritation. Seek medical attention at once, do not induce vomiting.
