LRC27 – Wood Reviver & Cleaner

The wood reviver and cleaner is a unique solution to clean and revive all types of timber surfaces.

The wood reviver and cleaner is designed to clean dirt and grime off all wooden surfaces, by removing dirt build up, silicones and waxes that have gone dull.

As well as being used to clean and revive timber, from a French polished surface to a lacquered finish this product is also great for use on wooden surfaces in cars where there is a highly polished surface like burl walnut in classic cars.

Wood reviver helps prevent warping, cracking discolouration, staining and sun bleaching on wooden surfaces as it contains organic oils that nourish and feed the wooden surfaces. Makes light work of removing nicotine staining and colouring.

Can be used to polish and clean piano black in cars as well as high shine varnished wooden surfaces in cars.

For best results pour the contents into a bowl and soak the cloth in the solution then wring out, so that the cloth is left very damp with the wood reviver. Start by wiping over the surface in a circular motion to deep clean the timber, this will remove all types of dirt and grime as you go, re soak the cloth and start again. The final rubbing should be done with the grain to accentuate the grain pattern and colours, always use a soft lint free type cloth like a terry towel or a [bamboo fibre cloth](#).

It's a fantastic product as its natural oils can soak into the grain, bringing out the true beauty of the timbers colour and grain patterns.

French Polished surfaces do really come alive with this wood reviver, it's based on a 150-year-old traditional recipe to clean, revive and give new life to old dried out looking timbers and wooden surfaces.

Depending on your wood type this may want protecting even further after using this product with the [wood wax paste](#).

Take a look at the [YouTube Video](#) about this product.
