LRC28 – Vinyl Cleaner

The vinyl cleaner is a natural water-based product that's ultra-safe to use for you, your vinyl and the environment, with a deep cleaning action with a bubble gum perfume.

The vinyl cleaner is capable of cleaning down all types of vinyl on the inside of vehicles and marine items, including hard plastics.

Not only does it deep clean with astonishing results it brightens vinyl colours make them bright and vibrant once again.

It can help to soften hard brittle vinyl too.

It's a natural water-based formula designed for all types and colours of vinyl, be that retail standard vinyl, contract vinyl, commercial vinyl or marine grade vinyl.

Application is by spray directly onto the item and then scrub in with a brush or bamboo applicator pad. Working in all directions to ensure it deep cleans and gets into the grain pattern correctly. Once cleaned wipe over the surface with clean damp cloth, use warm water to dampen the cloth, this removes all residues and leaves the surface ready to be protected.

The first stage of cleaning is to lightly vacuum off your vinyl item with a soft brush attachment to remove all dirt and debris from the surface, this will avoid scratching the vinyl when the cleaning process starts with a cleaning brush.

Step 1 vacuum off the vinyl item to remove debris

Once you have cleaned the area you are working on, stage 2 is to lift all dirt away with a [natural bamboo towel](#) or soft terry towel, turning the bamboo cloth or terry towel to a clean side as you go. This will help to dry the surface leaving the vinyl feeling and looking fresh again.

Stage 3 is giving your vinyl item some protection, this can be carried out using multiple products, leather protection cream, leather juice, leather guard, dye stopper or leather protection spray. These all work very well on vinyl items and provide great long term lasting protection.

The vinyl cleaner can be used on leather items if used with caution. With leather items, you may find that after deep cleaning with this you would need to [re lacquer](#) your leather item.
