LRC31 – Anti Bacterial Spray

The Anti-Bacterial Spray can be applied to any type of surface, not just leather, but works on fabrics, fake leathers, wood, metal, glass, plastics and much more.

It will also help with flu viruses to help stop them from spreading by using the Anti-Bacterial Spray as a wipe clean product to wipe over areas where someone has touched or sneezed to kill and rid it of bacteria and flu viruses.

With the antibacterial spray containing antibacterial agents, it's great to stop the growth and work perfectly in those hard-to-reach areas or areas that are tricky like toilet flushes and door handles. They can also be used on flat surfaces like kitchen worktops.

It's a simple spray on wipe over application product and leave to dry naturally, this gives a long-lasting coating of protection to all types of surfaces.

With this product you don't need to soak the item being coated. It's a standard spray application, spray from approx 8 inches away from the surface ensuring you apply an even coating, on absorbent materials like fabrics they would require a second application.

It's always advised to check in a small hidden area for colour fastness when using any product that's applied to any surface.

In kitchens and bathrooms always make sure the surfaces are fully dried and never place food directly onto a coated surface.

With this coating you should always use a mask when spraying and make sure the areas are well ventilated.

Drying times can be shorter or longer depending how thickly this has been applied, so can be as short as 5 minutes and as long as 20 minutes depending on atmospheric conditions and the amounts applied.

Take a look at the [YouTube Video](#) about this product.

Available sizes, 50ml – 1,70 fl oz, 100ml – 3.4 fl oz, 250ml – 8.5 fl oz, 500ml – 17 fl oz, 1ltr – 34 fl oz, 5ltr – 176 fl oz
