LRC40 Luxury Mousse Cleaner

To clean nappa leather, two tone, rub off or antique pigmented leathers you need to use LRC40 Leather Mousse Cleaner.

The leather used in super cars is normally top grade and open pore, so this luxury foam cleaner is the perfect partner for cleaning such higher grade leathers, keeping safety in mind for the surface coating. They are normally a veg tanned leather with a fine pigmentation coating still leaving hair follicles visible.

The LRC40 Luxury Mousse Cleaner is a very effective cleaner that deep cleans into the grain removing all dirt and grime. A mousse cleaner is required where leathers are a little delicate like two tone finishes, antique items, rub off leathers, or fine nappa leathers where you don't want to over-wet the surface to be cleaned. This means the mousse cleaner works perfectly on pigmented fashion goods where you don't want to create a stain from cleaning a smaller section.

Pump the LRC40 Luxury Mousse Cleaner onto a bamboo cleaning pad and work into the leather in a circular motion. This will lift all the dirt and grime away from the leather as it deep cleans the area. Then wipe away all dirt and grime with a bamboo fibre towel.

If your leather is extremely dirty, then you can use a Brucler Leather Cleaning Brush to agitate the mousse onto the surface to lift away the dirt and grime, creating a beautiful, luxurious finish. Finishing off with a bamboo cleaning pad to remove any final dirt and grime.

Predominantly, leather that has a sheen to it, is generally dirty. The sheen is created due to grease and grime on the leather that becomes shiny when friction occurs. In a lot of cases leather has a semi-matt finish to it, but when it's gone shiny it's the dirt and grime creating the shine, causing further damage to your leather surface.

Depending on your type of leather to be cleaned if it's a car interior or standard leather furniture then it's most likely to be pigmented leather.

We have given below a guide to cleaning fine leathers. On items such as [Aniline Leather](#) you will require dedicated aniline leather cleaner for this type of leather, but the protection applied after cleaning is the same.

The first stage of cleaning is to lightly vacuum off your leather item with a soft brush attachment to remove all dirt and debris from the leather, this will avoid scratching the leather when the cleaning process starts. If you are cleaning a handbag or purse, then it's advised that you vacuum out your item from all compartments first of all.

Step 1 Vacuum off the debris – Leather Cleaning

The next stage is to use a microscope if you have one to assess any damage that may be on the leather where you have to proceed with caution.

To the naked eye, a great deal of damage on the leather surface cannot be seen unless you use a microscope to view this correctly. See the picture below of damage viewed via a microscope, that normally would not be seen.

Damaged Leather Through A Microscope

Once you have passed this stage you can proceed to use the LRC40 Luxury Mousse Cleaner, this can be pumped directly onto a sponge and work into the leather in a circular motion, lifting all dirt and grime away into the foam. If you don't have a sponge then the Luxury Mousse Cleaner can be pumped directly onto the leather and you can work this into the grain with a [brucle leather cleaning brush](#).

Once you have cleaned the area you are working on, lift all dirt away with a [natural bamboo towel](#) or soft terry towel, turning the towel to a clean side as you go. This will help to dry the surface leaving the leather feeling and looking fresh again. Let your items dry naturally NEVER force dry them with heat. Always protect your leather after cleaning.

Take a look at the [YouTube Video](#) about this product.

Available sizes, 250ml.

Use Within, Use within 24 months of purchase.

Manufacturers Warranty 12 months from point of sale.

Temperatures, do not allow to freeze or go below 7 °C.

Before Use, always check in a small hidden area before using to ensure no colour is released.

Colour, a clear liquid that turns to foam on pumping the containers top.

Smell, built in genuine leather aroma.

Formula, water-based cleaning solution.

Skin Allergies, if you have skin allergies always wear gloves.

Cautions, Harmful if swallowed. Keep out of reach of children, may cause skin irritation. Seek medical attention at once, do not induce vomiting. Avoid contact with eyes, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so, continue rinsing.

Uses, to clean leather with a delicate cleaning action.

Works on these leathers, pigmented leather, top coated leather, antique leather, two tone leather, rub-off leather, waxy pull-up leather, bonded leather, bicast leather, Vinyl, Faux Leathers, Vegan Leathers.
