LRC41 Leather Guard

Leather Guard® is a coating system, designed to stop stains and keep leather cleaner longer and slow down damage, cracking and ageing.

The best technology in stain protection in the world.

The leather guard® protection system is a very thin watery type of product that is white in colour.

The leather guard® protection coating forms a synergistic barrier which becomes an integral part of the leather hide itself.

A natural, non-toxic, environmentally sustainable product, the ultimate stain protector, helps stop and prevent most stains from things like, coffee, wine, juices, curry, food, suntan lotion, chips, fake tan, make up, jean dye, newspaper print and many more damaging your leather.

The leather needs to be fully deep cleaned and dry before this coating is applied, so start by vacuuming off your leather or vinyl item, thoroughly deep clean all the surface and allow to dry naturally, never force dry leather as this can cause staining.

Leather Guard® is designed to become an integral part of the hide itself forming this coating barrier that allows the hide to breathe correctly whilst stopping stains and dirt build up, makes cleaning a great deal easier with a simple wipe down every now and then.

Once leather guard has been applied it's like a traditional ceramic coating, in that it requires maintenance to keep its protection strong and durable. LRC4 leather protection cream can be applied over the top of leather guard® or LRC38 leather protection spray. You would only require a single application of LRC38 twice a year, whereas LRC4 can be applied once a month to give a fantastic protection. In effect it's a preservation system for the coating.

Leather is a lot more delicate than people think it is, it's not like car paint at all, it requires a great deal of care and attention to maintain that new look and feel.

If you want to get the three-year protection guarantee you need to have the Leather Guard® protection system applied by an approved technician. You can find an approved technician by contacting us [Application Technicians](#) book your leather guard® protection in today.

With three years guaranteed coating when this is applied by an approved technician, your leather will be fixed FREE of charge if a stain does not clean off, our network of approved technicians will resolve any stains and claims under the warranty within the 3-year period. They will come out, remove the stain and if needed re colour the leather and seal again and re-apply leather guard.

Instructions.

Applying Leather Guard® is simple and easy to carry out.

Before you can apply leather guard to your item this has to be deep cleaned and free of damage.

First of all carry out a full deep clean on your item.

Then when your item is fully dry you can apply the leather guard® system to your leather.

It is best applied in a circular motion making sure you do not leave streaks on the surface when it's fully dried. Only a thin coating is required, spray this onto an application pad and rub on in a circular motion to ensure all areas are covered without leaving any streaking behind.

Once completely dry you can apply a protection cream to the surface to give even greater protection if required.

This is a single stage application product.

250ml of leather guard® will be enough to cover 2 x car interiors or a large 3-piece suite

500ml of leather guard® will be enough to cover the equivalent of 5 car interiors or 2 x 3-piece suites

1 ltr of leather guard® will be enough to cover 10 car interiors or several 3-piece suites.
