LRC42 Wood wax paste

The wood wax is designed to feed wooden items and give a protective coating to all types of wooden surfaces, including varnished wooden areas.

Being a wax paste product, it's designed to give a protective layer on the surface to protect natural timbers, varnished or lacquered surfaces.

Being a neutral colour, it's designed to work on modern and antique finishes, bringing out the natural beauty of the woods grain without changing its colour or appearance.

It adds natural oils back into the timber to enrich it and provide a protective layer to preserve the surface.

Make sure your items are dust free and any debris is brushed off the surface, as the last thing you want is to scratch the surface.

The wood wax will work on all types of wood including veneered surfaces, helping to stop stains and moisture from damaging the surface of varnish.

It provides a fantastic protective layer to enhance colours and grain patterns to bring out the best in your wood, leaving behind a strong durable coating to protect and preserve the surface.

Items that are very dirty and ingrained with grime over the years must be cleaned with the wood reviver and cleaner first, once this has been carried out you can apply the wood wax paste to your items.

You can then apply the wax paste in the direction of the grain, making sure all areas are covered with a fine coating then leave for around 4 to 6 minutes to cure and buff up with a separate cloth to produce a great shine and leave a protective layer on the surface.

The wood wax is designed to clean and polish in one simple easy to follow step, additional coats can be applied to give even great protection to the surface.

Wood wax is best applied once a year, liquids should bead up on the surface when they are protecting the wooden surface, if they happen to lie flat then further applications are required, in normal circumstances the wood wax paste offers around 12 months of protection on timber.

Take a look at the [YouTube Video](#) about this product.

Available sizes, 250ml – 8.5 fl oz.

Use Within, Use within 36 months of purchase.

Manufacturers Warranty 12 months from point of sale.

Temperatures, do not allow to freeze or go below 7 °C.
