## LRC48 – Leather Shoe Restorer Cream

The leather shoe restorer cream is designed to dye shoes or recolour existing leather but is powerful enough to change the colour of leathers.

The shoe restorer cream contains a very high concentration of natural beeswax and pure dyes, making it the only type of shoes cream like it in the world, as all others contain synthetic waxes and dyes, meaning they won't last long and are not permanent like this shoe restorer cream is.

Due to the nature of some dyes some of these shoe creams are not as thick as others, so some have a slight runny consistency while others are a thick solid paste.

These shoe creams actually dye the leather rather than sitting on the surface, so can be used to dye natural veg tanned or natural aniline that's not been dyed before, they can also be used to dye crust leathers ready for being turned into something magical.

This product requires to be sealed over with the antique silk dressing lacquer sealer, this seals in the natural shoe creams and locks the colour in for good so it can't be removed.

### Preparing The Leather For Colouring

Remove all dirt from the shoe uppers, then using a scrub pad lightly rub over the surface to remove the shoes dyes on the surface preparing them ready for the new dye to take.

Once you have removed enough colour you need to proceed carefully at these stages, so you don't damage the leathers grain, so swap to using a cloth and the leather prep solution, rubbing this over the entire shoes upper to remove as much dye as possible, once this has been carried out wipe down the shoe with alcohol cleaner, any scuffs or marks should be sanded out at this stage, the 1200 grit sandpaper should be fine for doing this, you can go as rough as 280 grit foam sanding pads but use much less pressure, the foam sanding pads are much easier to control than sanding paper. Once you are happy with the scuffs being sanded, you can proceed with applying the shoe cream.

The shoe creams are very powerful so a little goes a long way, apply a small amount to the special imitation sea sponge and work into the leather, making sure you don't leave streaks as you've applied the cream. Depending on the look you're after, you can apply more coats once each coating has dried, leave for around 30 mins, longer is better to allow the natural beeswax to set properly. Once it's fully set, you can apply another coat of shoe cream. We always leave the final coating on and buff up after 24 hours and then apply the antique silk dressing lacquer.

As it contains natural beeswax, you can't speed up the drying process with a hair dryer as it will melt the beeswax and not let it set, let the shoe creams cure naturally.

Take a look at the ([Shoe Video](#)) about this product.

**Available sizes,** 50ml – 1.70 fl oz, 250ml – 8.5 fl oz,

**Use Within,** Use within 24 months of purchase.

**Manufacturers Warranty 12 months from point of sale.**

**Temperatures,** do not allow to freeze or go below 7 °C.

**Colour,** various

**Smell,** no specific scent or aroma, slight chemical smell

**Drying Time,** leave to dry naturally in around 30 mins (DO NOT SPEED UP WITH A HAIRDRYER)

**Formula,** a paste containing pure dye

**Skin Allergies,** if you have skin allergies always wear gloves, wear goggles when applying.

**Cautions,** Harmful if swallowed. Keep out of reach of children, may cause skin irritation. Seek medical attention at once, do not induce vomiting. Avoid contact with eyes, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so, continue rinsing. Use a mask at all times using in a well-ventilated area.

**Uses,** to revive the colour on leather

**Works on these leathers,** pigmented leather, top coated leather, aniline leather, semi aniline leather, antique leather, two tone leather, rub-off leather, veg tanned, crust leather, cognac leather, waxy pull-up leather, croc skin, alligator skin, lamb leather, deer skin leather, cow leather, calf leather, top grain leather, full grain leather, embossed leather, vachetta leather.

**For use on,** Shoes, Leather Jackets, Motorcycle Leathers, Leather Boots, Leather Purses, Leather Trousers. Leather Clothing, Motor Bike Leathers, Leather Gloves, Leather Book Covers, leather clutch bags, leather wallets.
