LRC55 Leather Spew Remover

Leather Spew remover is a cleaning system to remove the migration of fat liquors from the surface of leather.

Manufactured using the latest technology to remove leather spew migration from leather.

Removes the migration of fat liquors and prevents recurrences.

Suitable for all types of leather

- Easy application
- Instant results
- Removes white hazes (spew) from leather & prevents re-occurrence

The spew remover is a water-based product designed to remove fat liquor migration or natural animal fats that are contained within leather hides that can migrate after the tanning process.

This spew remover not only removes the migration of fat liquors it leaves behind a coating that helps prevent the spew re-occurring again.

Fat liquors can easily be identified by heating up with a hair drier, they then go clear, but then re dry as a white haze again.

Instructions.

Applying Leather spew remover is simple and easy to do

You can spray the solution directly on to the leather and work in with a cloth or a very soft horse hair brush, if you didn't want to spray on directly then this can be applied to a bamboo fibre towel and gently wiped over the surface to remove the spew migration.

Once completed, wipe over the surface with a leather cleaner and then protect the leather with a protection cream.
