LRC57 Leather Cross Linker

Leather Cross Linker is a crosslinking system, to add wear properties to leather paint and clear coat lacquers.

Manufactured using the latest technology to give leather surfaces an even harder coating and to last even longer than before.

Creates a harder tougher coating.

Suitable for all types of leather paints

- Easy application
- Improves rub fastness
- Increases resistance to grease, grime and sweat
- Toughens leather finish

The cross linker is a water-based product designed to give better wear characteristics, giving better rub fastness, increasing resistance to sweat, grease and grime.

Instructions.

Shake the bottle rigorously before use for many minutes.

Apply Leather Cross Linker, directly into leather paint or sneaker paints, or clear coat lacquer sealers. Once pored in, mix thoroughly to ensure all is blended together, then filter the paint or lacquer before use.

Only add the Cross Linker to the paint or clear coat lacquer you are going to use, as they must be used within 48 hours of being mixed together.

Never exceed more than 5% crosslinker in a colour mix or into lacquer.
