## LRC59 – Raw Hide Base

The raw hide base is as form of resin carrier for adding dyes into to make an user product to be used to dye undyed leather or veg tanned leather, dye tooled and crust leather.

It's a base product and can't be used on its own for any purpose it can only be used with the raw hide dyes, by mixing the two together to gain a finished product

Next stage is mixing the raw hide dye with the raw hide base. Here is a guide of how much dye you will need to add to the base sizes: 5 litre of base will need 1 litre of dye, 1 litre of base will need 200ml of dye, 500ml of base will need 100ml of dye, 250ml of base will need 50ml of dye, 100ml of base will need 20ml of dye, 50ml of base will need 10ml of dye.

To finish with these pure raw hide dyes it's advised to set them and seal them in place with a single coat of sealing lacquer, you can use the [antique sealing lacquer](#) for a silky finish, or the [standard lacquer](#) for a standard type of

Take a look at the **YouTube Video** about this product
